

COM RETAIL PRICING GUIDE

- Dallas
- Amarillo
- Houston
- Laredo
- Waco

Group 4

Price charts are based on solids that are stable materials. Use this chart to price shades in this style group in many COM (railroaded fabrics, difficult fabrics, railroading and exact pattern placements or matching will incur surcharges). Simply find your size and drop down the column to find your labor, yardage required and optional linings (linings are priced per lining). At the bottom of the column you will find popular options and freight charges. Labor charge includes our regular poly/cotton lining. All COM linings are surcharged. Optional linings include heavy sateen, interlining, thermal or room darkening.

Important:

1. Most fabrics currently available in the industry are considered “difficult” because of patterns or instability. As a precaution, since we cannot determine this until we receive the fabric, we recommend that you quote all COM jobs as difficult to avoid under pricing. Patterns may not fall uniformly on spaces between pleats. Seams are usually placed in middle of shade or where best suited.

2. Also, do not send more yardage than requested in our charts as we are not responsible for any additional fabric and no remnants can be returned without a \$25 service charge (plus shipping).

3. Many fabrics are upholstery fabrics and are shown with the pattern railroaded. All goods must have face and pattern direction noted and your name and side-mark must appear on packaging. Work order must be faxed ahead of fabric and any enclosed copy must be marked “Copy.” Packaging must note if payment is enclosed.

Note: See bottom of COM chart. Price charts are based on number of widths of goods used. At shade widths nearing 36” and 72”, some styles may have substantially less fullness. At widths nearing 36”, Dallas, Amarillo & Houston are affected, and at 72”, Dallas & Amarillo are affected. If more fullness is desired, request extra fullness and supply yardage requested at the next width size.

Difficult Fabric:

- Add 25%

CCO (Continuous Cord Operation)

- Popular lifting system that works like a RollEase with less moving parts. Requires 2 ½” headboard.
- Price as RollEase

Freight & Fabric Liabilities: Includes insurance on COM fabrics up to a maximum of \$50 per yard and only for requested yardage. For all fabrics over \$50 per yard a written notification must be provided prior to production in order to properly insure materials. Widths over 102”: Call for quote. Crating charges may be incurred. Freight for all motorized shades by quote. Freight rates are subject to change without notice.

- For Prints, add 1 repeat for every cut.
- Top Treatments: Add 12” to the valance length and add returns on the width.
- Pattern Matching will require additional fabric.
- R.E. = RollEase
(See previous page for control information and pgs. 6 & 29 for important warranty information on RollEase)
- See pg. 29 for more details on: Railroaded fabrics; Difficult fabrics; and, Pleat matching and 2 on 1 headboard.
